Selection Guide

What can you build with Selkirk?

Moonshadow

Welcome to **Selkirk**

Congratulations, you've come to the right place.

For over 130 years, Selkirk has created both contemporary and classic building materials. You're sure to find inspiration for your perfect home amongst our range of clay brick and paving products. We offer colours and textures to suit any taste or architectural style. You won't find better materials to build with than those from Selkirk.

Over a century of helping Australia build better.

With our roots proudly based in regional Victoria, our progressive company has built a solid foundation on craftsmanship, service and expertise. While our focus remains on these important qualities, Selkirk is committed to innovation. Our continuous improvement and product development has made Selkirk a well respected industry leader.

More than ever, we are committed to the vision first established by our founder Robert Selkirk in 1888. His original principles of expert craftsmanship through a time-honoured technique, resulting in unique, high-quality products, still hold true today.

Selkirk presents superior quality building materials for residential, landscaping and commercial projects. We invite you to take a closer look, and see what you can build with Selkirk.

Why build with brick ?

Selkirk bricks and pavers have long been acknowledged as among Australia's best. Selkirk's quality procedures, ongoing investment in technology and unique clay deposits from Victoria's Goldfield region set standards for durability and strength.

SUSTAINABLE

Bricks are manufactured to last forever, making brick an inherently sustainable building material.

LOW MAINTENANCE

Bricks require minimal work to keep them looking great. After all, your home should be a retreat, not another job!

ROBUST

Bricks are strong and will resist harsh weather conditions, termites and noise.

ENERGY EFFICIENT

Bricks have a high thermal mass producing a cooler house in summer and warmer house in winter. This can significantly reduce your energy bills.

VERSATILE AND STYLISH

Selkirk offers a vast range of brick colours and styles to choose from. Whether your tastes are modern, classic or anywhere in between, we have a brick to suit your project.

AFFORDABLE

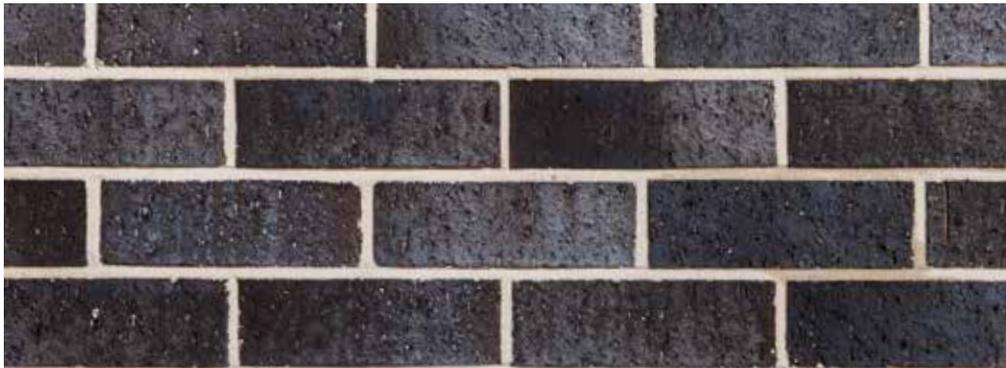

You could be pleasantly surprised at just how affordable bricks are. Furthermore, after the initial investment, ongoing costs are extremely low.

Black Diamond

Selkirk extruded bricks and pavers are manufactured in accordance with Australian Standards.

ILLUMINA BLACK DIAMOND

ILLUMINA PLUM SAPPHIRE

the **Robert Selkirk** COLLECTION

When Selkirk Brick was founded 130 years ago it was with a commitment and passion for creating and manufacturing premium quality bricks. The Robert Selkirk Collection celebrates these original values while delivering contemporary crafted bricks that allow an expression of individual styles.

ARTISAN LYDIARD

ARTISAN LONSDALE

ILLUMINA RANGE

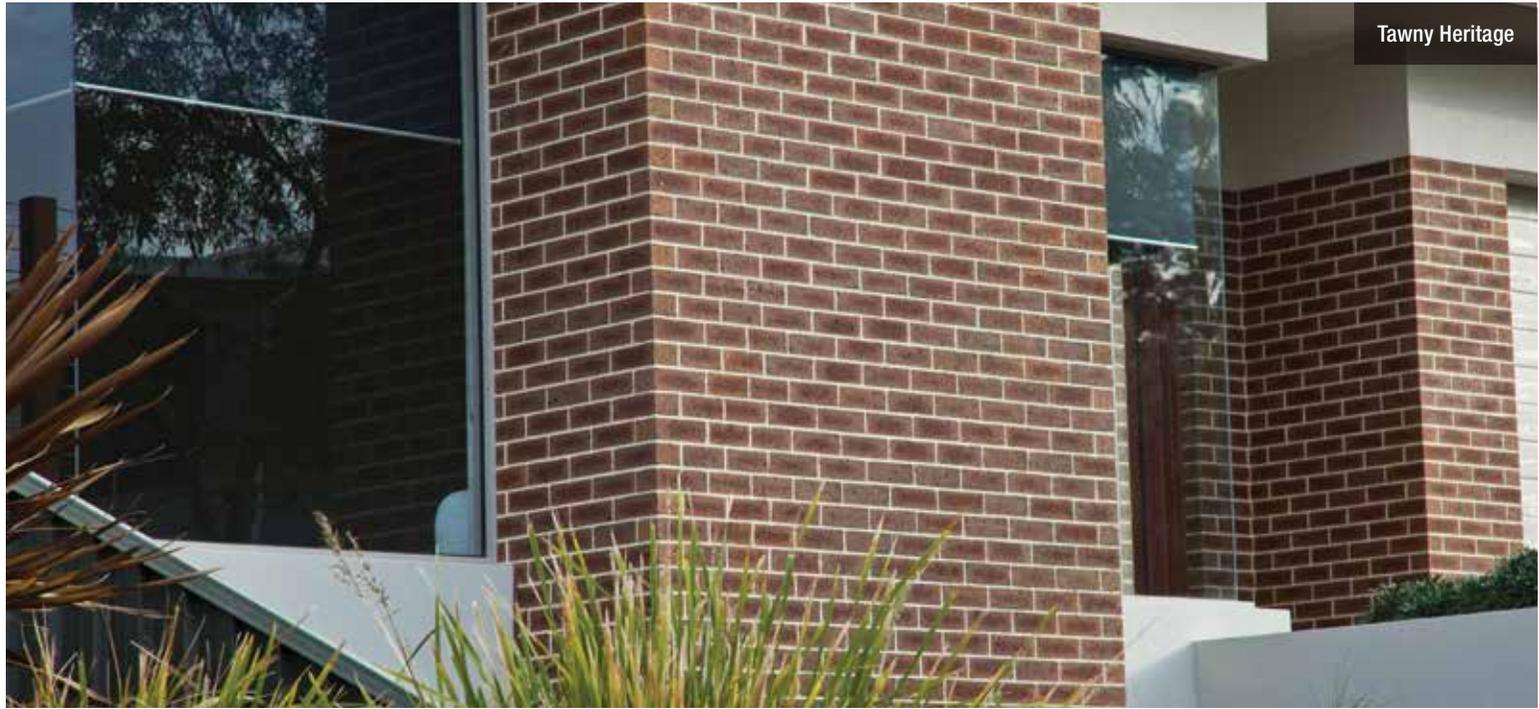

The ILLUMINA range is inspired by precious stones and adds a lustrous semi glazed finish to the most sophisticated and contemporary designs.

ARTISAN RANGE

The ARTISAN range reflects classic, timeless design with a textured handcrafted appearance which acknowledges the beauty of natural earthy origins.

Artisan is available in both slimline 50mm and standard 76mm dimensions which enables design solutions that play with proportion and scale.

Essential Collection

VERSATILITY, QUALITY AND BEAUTY... IT'S ALL COVERED

With their rough-hewn, unique textures, these bricks blend a striking colour palette. A choice from this selection will imbue your home with a stunning, natural feel.

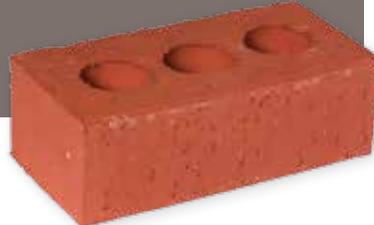

VICTORIAN GOLD

VICTORIAN RED

GOLDFIELD HAZE

MUSKET HAZE

Classic Collection

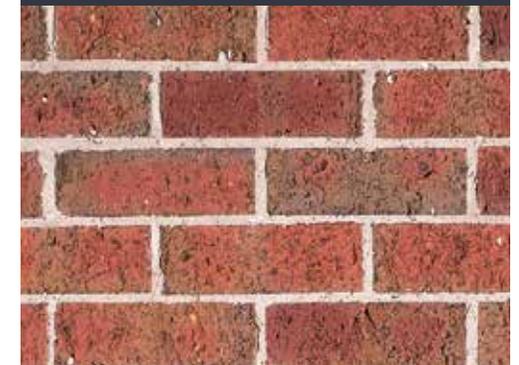

TRADITION AND STYLE, PERFECTLY COMBINED

The coarse composition and hearty texture of this collection provides the opportunity to achieve a striking visual statement. Quality materials are blended with rough, natural quartz to create Goldfield Haze, Musket Haze and Rebellion Red bricks that become a fantastic feature in their own right.

For a more traditional aesthetic, the familiar colours and subtle texture of Victorian Red and Victorian Gold provide a classic 'tried and true' alternative.

REBELLION RED

Brick Shapes

The right shape can help keep your building in line with modern, period or federation-style architecture. Choose shapes for decorating windows, or to add an attractive capping to fences and retaining walls. The choice is yours!

SILL BRICKS

The gentle sloping edge of a Selkirk Sill brick decorates windows and provides a capping for fences and retaining walls.

CANT BRICKS

Used to soften the edges of windows and door openings, Selkirk Cant bricks can be used in conjunction with Selkirk Sill bricks.

SQUINT BRICKS

Selkirk Squint bricks are used to continue the line of brickwork around a 45 degree corner, such as that required for a bay window.

BULLNOSE BRICKS

The rounded edge of the Selkirk Bullnose Brick is frequently used on the top of fences and retaining walls. They can even be used to turn a low wall into a convenient seat.

PLINTH BRICKS

Selkirk Plinth bricks can be used to extend the base of a building. Some creative designers have even placed them upside down at the top of a wall to make a sloping transition to the eaves.

Additional shape and size variations available on request. Please visit the website or contact Customer Service on 1300 650 006

INSIGNIA OR PERSONALISED BRICKS AND PAVERS

Ideal for homes and commercial buildings alike, Selkirk INSIGNIA bricks and pavers are permanently marked with your choice of letters, numbers or personalised designs. The high quality inscriptions are computer engraved into the bricks or pavers of your choice.

IMPORTANT

When planning to use Selkirk Brick Shapes for your project, check availability with your nearest Selkirk Selection Centre. Please remember that forward ordering is essential, as some units are made to order only. Available in most wirecut colours within the Selkirk brick collection.

Clay Pavers

Selkirk Clay Pavers provide limitless outdoor design options, with an exquisite selection of natural colours that can be laid in a variety of patterns for striking results.

Quality pavers... with infinite possibilities. Let the visual beauty and individuality of clay brick paving shine through in your next landscaping project. Abrasion, fade and slip resistant, more and more customers worldwide are appreciating the unique features - not to mention choices in patterns which can be achieved.

Selkirk Clay pavers let you mix-and-match colours and shapes to make your own unique statement. Use them to liven up an outdoor area, or draw focus to a feature you love.

PAVER RETURN**

SOVEREIGN RED

SOVEREIGN REEF

**As paver shapes are made to order, forward ordering is essential.*

Finishing Touches

A unique brick shape or coloured mortar creates distinctive architectural features and visual interest for your project, adding a real sense of individuality.

Black Diamond with Urban Architectural Panel

MORTAR JOINTS AND COLOURS

Different combinations of sand and cement can have a significant impact on mortar colour, and contribute to the overall look of the final brickwork. Changing the mortar colour from white, or natural to black can have a dramatic effect.

Selkirk recommends Rolled or Flush Mortar joints when using our products.

CONCRETE MASONRY PRODUCTS

Visit our website to view our range of concrete masonry products including block, pavers and retaining walls.

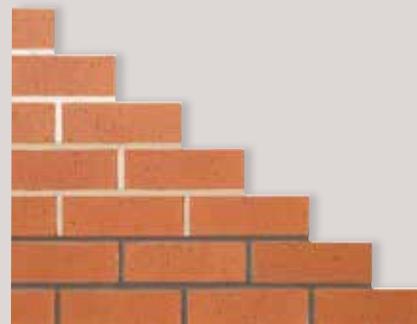

www.selkirk.com.au/landscaping-products

www.selkirk.com.au/masonry-block

NATURAL VARIATIONS IN CLAY

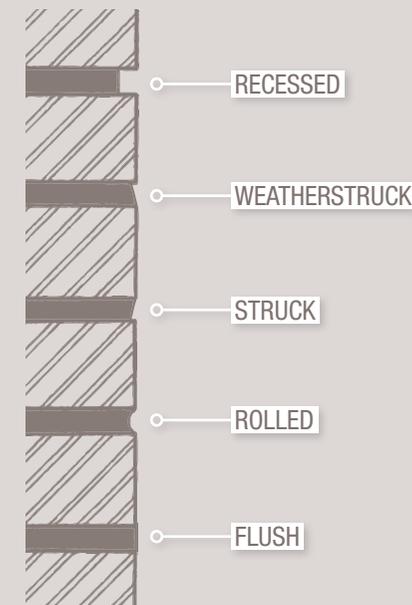

When considering your design please remember that clay bricks and pavers are manufactured using natural clays and minerals, and therefore colour variation between manufacturing runs is possible. Please refer to our disclaimer on the back page of this brochure.

MORTAR COLOURS

The bricks pictured are Victorian Red. Talk to your Builder or Bricklayer for more information regarding the various mortar colours available.

MORTAR JOINTS

Preparing for delivery

The final step in ensuring that Selkirk provides you with an outstanding product and quality service is to ensure that your product makes it to site in a timely, safe and responsible manner. Answering these simple questions can ensure delivery is a smooth process. After all, the sooner the products arrive, the sooner your project can commence!

WHEN SHOULD I ORGANISE THE DELIVERY OF MY PRODUCT?

Selkirk recommends that you arrange your delivery to be at least 48 hours prior to the commencement of work. Delivering your product the same day as work starts will result in loss of time. Selkirk advise that, where possible, you take your entire order in a single delivery.

IS MY SITE ACCESSIBLE BY SELKIRK DELIVERY VEHICLES?

Selkirk delivery trucks are large – 15 metres long, 2.5 metres wide and 4 metres high – and require appropriate safe parking in close proximity to your site. Selkirk all terrain forklifts, used to place building products on site, require at least 2.5 metres clear width and 3.0 metres clearance height.

Therefore, Selkirk Customer Service needs to know if there are any obstacles or restrictions that may cause difficulties in accessing your site. If Selkirk drivers are to operate equipment on busy roadways, clear ways, in close proximity to schools/crossings, double lined roadways etc. It is your responsibility to provide traffic control in order to maintain a safe working environment.

(Please note: traffic control persons must be trained and hold a current certificate of competency).

IS MY SITE CLEARLY IDENTIFIED?

If your site is not clearly identified, you can obtain a Selkirk site sign from your nearest Selkirk office. Please mark the site clearly with the street and lot number.

CAN MY SITE SUSTAIN THE WEIGHT OF PRODUCT AND MACHINERY DURING DELIVERY?

A forklift carrying bricks or pavers can weigh around 7 tonne. It is your responsibility to ensure that any surface the forklift traverses over is capable of sustaining this weight. Selkirk will not be liable for any damage caused to underground services.

IS MY SITE SAFE ENOUGH?

Please ensure that children are well out of the way and pets are restrained.

Selkirk drivers are well trained and will do their best to place your product where required, but the driver has the final say when it comes to personal risk or possible site damage.

IS THERE AN EASIER WAY TO GO ABOUT THINGS?

If you are building a large house that takes up most of the block, you may consider taking delivery of the bricks for the rear of the house prior to the excavation of the site and the pouring of the slab. This will help your bricklayer avoid damage to the slab or the possibility of Selkirk being unable to place your product where you require it.

**Selkirk offers a wide range of building materials,
for residential, landscaping and commercial projects.**

We understand that making a decision can be difficult. Now that you have read our brochure, we recommend that you continue your research.

Try viewing our website which has extensive information and photos on the full Selkirk range or call our friendly customer service team who will answer any of your questions and provide invaluable advice.

Finally, before you make that all important decision, visit one of our display centres or authorised retailers so that you can see and touch our products. This will give you a clear indication of colour and texture so that you can accurately visualise your project. You can even take a sample of the product home with you.

DISCLAIMER

Selkirk clay bricks and pavers are manufactured using natural clays and minerals and are then kiln fired. This process results in natural colour variations between individual units, packs and manufacturing runs. The product colours shown in this brochure may vary to the actual product available at the time of order, subject to variations that occur during manufacture and the limitations of photography and printing.
